feel the *Glorious* edge...

## ABOUT US

At ASIS Edge Banding, we are dedicated to creating a beautiful product experience. Our edge banding services offer various thicknesses and colors that cater specifically to you making sure the textures, structures, and finishes match your desired laminate choice! We strive for reliability and consistency in all of our edge bandings, so you can always trust us as your NO.1 go-to edge banding company when it comes to finding sleek yet durable designs with superior quality satisfaction.

With our wide selection of edge banding for sale, you can customize your furniture and express yourself with thousands of solutions. Choose from a variety of options of PVC edge banding, it comes in lots of size and color or pattern. No worry about cracking, moisture absorption & formaldehyde release, also our edge band is so more durable. The formal order color is 100% match to sample colors is guaranteed too.

## AREAS OF APPLICATION

ASIS Edge Banding is used to finish narrow areas of laminated wood-based materials such as chipboard, MDF, HDF, as well as lightweight boards, and provides the perfect finish for all decorative surfaces. It can be used in a wide variety of areas: furniture for kitchens, bathrooms, offices, bedrooms, living rooms, children's rooms, trade fair construction, and shop fitting systems. In addition to regular use, ASIS Edge Banding is suitable for coating freestanding parts.

## THE SPECIAL FEATURES OF ASIS PVC EDGEBANDS

Asis PVC edgebands are manufactured using the extrusion process and are fully imbued. Uniform imbuing of the material permits clean and straightforward edgeband rounding. The impact-resistant material constitution of the PVC guarantees smooth processing on the fabricator system, and many years' usage as furniture. A special formulation has been developed by ASIS for PVC edgebands which guarantees long service lives for milling and other cutting tools. PVC edgebands are coated on the back with a universal bonding agent which permits perfect bonding of the edge on the carrier material in conjunction with all suitable hot-melt adhesives, and all solvent-based adhesives.

## APPLICATION AREAS OF ASIS PVC EDGEBANDS

The spectrum of applications for ASIS PVC edgebands is virtually unlimited - for the office, bathroom and kitchen, for shop fittings and exhibition stand construction, for residential areas and for any types of fixtures and fittings. The particularly application-friendly raw material formulation of the Asis PVC enables straight working as well as smooth deployment on all curved furniture geometries, irrespective of whether inner or outer radii are required.

## MACHINE PROCESSING

ASIS PVC edgebands can be used on all edge glueing machines with hot-melt technology. Bonding, cutting, milling, working with the draw blade and subsequent processing with polishing wheels and hot-air apparatus for high quality surfaces are possible without problem. A few central process parameters need to be observed for clean and permanent edge coating, which are currently dependent on the materials used (edgebands, adhesives, boards), the edge glueing machine and the ambient temperatures. Determining the best settings with trial and error is therefore recommended in each case. The guideline values specified by the manufacturers for the respective applications must be observed.

## CLEANING

The edge bands are resistant to moisture, therefore, to remove any dirt, a damp cloth and any household cleaning agent, dedicated for furniture care, is recommended.

## STORAGE

It is recommended to store ASIS PVC edge bands at room temperatures, in places isolated from atmospheric elements. Prolonged storage of the edge bands under negative temperatures causes partial degradation and gives the effect of cracking of the band. It is recommended to store the bands in the original packaging in horizontal position.

Note : All shades are available in all sizes and finishes as per order.
